

## Report – Economics AS Level workshop

The recent workshop with DPSI 2021 batch alumnus and A level Economics topper-Medhansh Kumar conducted on 15th of July 2021 surely left the economics students of AS level feeling more confident to face the crucial next two years. Hearing him speak about his experience and how he finally went on to achieve an A\* in economics was a peek at what the subject had in store for the candidates. The students assiduously noted down even the most basic things like the names of the books or websites he studied from that helped him achieve such a result. Medhansh underlined the recurring questions that are the most and least scoring – thus facilitating students to understand CAIE expectations better. His tips and tricks on scoring by focusing on structuring a 12-mark answer like, the use of references from the Indian economy to explain arguments, helped the students feel self-assured. “If he can do it, so can we!”
